At PEER Chain, we know the challenges citrus packers face each and every day. We also know the conditions you work in demand efficiency and reliability.

- D-5 attachment pins are designed to help you move large amounts of fruit without costly downtime.
- Precision-engineered carbon and stainless steel roller chain for long-lasting dependability.
- **PEER Quest®** solid bushing chain with one-piece cold formed bushings extend chain life over conventional split bushing chains
- Exclusive **ProCoat Quest™** line can decrease chain elongation anywhere from 50-100% over conventional curled-bushing roller chain

Stay ahead of the competition. With innovative citrus chain from **PEER Chain.**
PEER Citrus Chain
Every Way You Want It.

NOTE: D-5 Chains Available in Carbon, Steel, Nickel Plated, Stainless Steel, ProCoat® and PEER Quest®.

PEER QUEST® Technology
Features & Benefits

- Shot-peened for greater fatigue resistance.
- Pre-loaded after assembly to minimize initial chain elongation.
- Hot-dipped lubrication ensures 100% coverage of chain components, reducing friction, minimizing the need for maintenance and extending chain life.

- PEER QUEST® Technology features solid bushing chain with one-piece, cold formed bushings which extend chain life over conventional split bushing chains. Extended chain life equals better performance and reduced maintenance costs.
- No slippage provides maximum power transfer.
- Available ProCoat® provides corrosion resistance while delivering the durability of carbon steel chain.
- PEER ProCoat Quest® – where carbon steel’s durability is desired with ProCoat® corrosion resistance and Quest solid bushings maximize performance and extend chain life.
