

PEER Chain Warehousing Initiative

Tough Warehouse Environments Demand Tough **PEER QUEST**® Roller Chain! When it comes to the rigors of warehouse environments, you need **PEER QUEST** Technology, only from **PEER Chain**. That's because **PEER QUEST**® utilizes solid bushings for long-lasting performance, less downtime, and better value. Designed to minimize wear and outperform conventional split bushing roller chain, **PEER QUEST**® roller chains employ solid

one-piece cold-forged bushings, providing a smoother, more cylindrical bushing wall.

This ensures that the contact between pin and bushing is maintained across the entire length of the bushing, increasing the longevity of the chain and optimizing performance. Demand more from your roller chain. Demand **PEER QUEST** - only from **PEER Chain**.

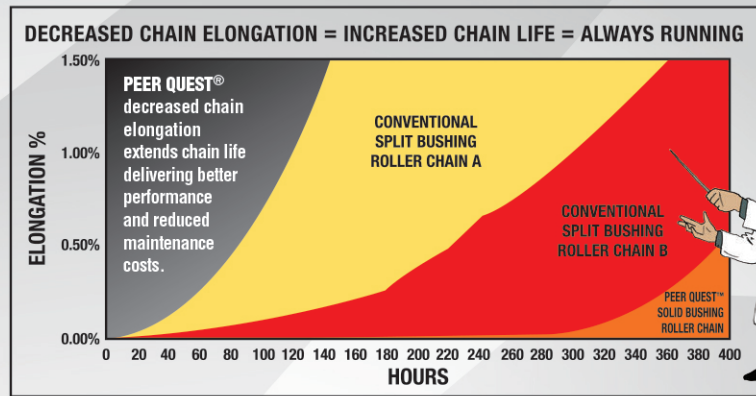

Conventional Split Bushing Roller Chains

PEER QUEST® Technology Features & Benefits

- Shot-peened for greater fatigue resistance.
- Pre-loaded after assembly to minimize initial chain elongation.
- Hot-dipped lubrication ensures 100% coverage of chain components, reducing friction, minimizing the need for maintenance and extending chain life.
- PEER QUEST®** Technology features solid bushing chain with one-piece, cold formed bushings which extend chain life over conventional split bushing chains. Extended chain life equals better performance and reduced maintenance costs.
- No slippage provides maximum power transfer.
- Available **ProCoat®** provides corrosion resistance while delivering the durability of carbon steel chain.

Inventory Cut to Length and Assembly Backs You Up!

Ever since starting **PEER Chain** in 1969 our family has always invested in deep Inventory and Person Relationships. So we can offer our customers readily available inventory that anticipates the unexpected, providing you with shorter lead times, and rapid turn-around that aligns with our family's fervent commitment to keep you up and running no matter what.

Automated Cut to Length & Assembly Masters = Rapid Order Completion

Our Fulfillment Center in Waukegan features automated cutting machines for commonly ordered sizes. Our Master Assembly lead will celebrate his 35th Anniversary with **PEER Chain** in June, 2016 and our Warehouse lead recently celebrated his 20th anniversary. You can rely on your experienced **PEER Chain** family to respond to your needs quickly and accurately so we can keep you running. Of course, all our chain must meet stringent quality assurance standards.

And our Technical and Solutions Center's commitment to testing as well as R&D enables us to stay ahead of the technology curve in the dynamic Warehouse marketplace.

Mighty Leaf Chain for Superior Material Handling

PEER Chain provides a comprehensive list of BL Series, AL Series, and Heavy Duty Port Lift Series leaf Chain used on fork lift trucks and Pier lifts and other lifting applications. **PEER ProCoat®** Leaf Chain provides corrosion resistance while delivering the durability of carbon steel chain.
